

TEACHING DURING PANDEMIC

1. Q: Why did you choose to become a teacher?

A: I always wanted to be a teacher, I like children, I like teaching and I thought that this work is the perfect solution.

2. Q: What is your favourite part of being a teacher; and what you don't like about it?

A: I believe that teaching is very important job. Children are like a blank paper and we, the teachers, have the responsibility of writing, drawing, colouring, painting and expanding the minds of our students.

And I don't like the paperwork; and tele-working during the quarantine, it was very stressful.

3. Q: Speaking about the quarantine, how is the school dealing and organizing the classes when children are at home?

A: Well... as I told you before, it's being a hard work that implies everybody. All the people who works at the school made a great effort during the pandemic last year. It was a challenge not only for teachers but, for students and parents too. Now, we all have learned how to find solutions, and everyone knows better how to work with the new technologies.

4. Q: Do you like to teach with the mask?

A: The first week I thought it was going to be impossible, but it is not a problem anymore. I know that we all have to get used to wear it.

5. Q: How are children behaving with social distance, hydro-alcoholic gel, and all the new rules?

A: They are giving us an example on how to behave, they are being very responsible. Students understand, now more than ever, that following the rules is very important to protect themselves, and others.

-Thank you very much for the interview.

-you're welcome.

Children are being an example for everybody inside and outside the school during the pandemic. 😊
